THC distillate oil at industrial extraction laboratory

enVgrow is excited to announce the commissioning of our custom, automated controls system in Broken Arrow, Oklahoma.

Raw material storage for distillation

enVgrow engineers programming a custom control panel

For our client, enVgrow designed and programmed a system that integrates all the extraction equipment and meets all fire and life safety requirements.

High quality concentrates from industrial extraction laboratory

In all extraction labs, proper life safety monitoring and alarms are required. enVgrow designs every system to meet or exceed regulatory requirements, keeping your employees and facility safe at all times.

Lower Explosive Limit (LEL) Sensor

Let enVgrow's team help you with your next lab project. Please reach out to us at [enVgrow.com](http://enVgrow.com)
