

be in the *know* when you grow

enVgrow's CO₂ flow station and controller with Gas settings in every zone.

Kings Garden Inc., Coachella Valley's most prominent cannabis cultivator, installed the first of five **NEW enVgrow® Intelligent CO₂ Enrichment Systems**.

Kings Garden's higher standard produces award-winning cannabis strains.

Kings Garden is recognized for its award-winning strains and unparalleled consistency. Its dedication to core values is witnessed in its superior products and its commitment to providing the safest environments for its customers and employees.

Kings Garden selected **enVgrow's** Intelligent CO₂ Enrichment Systems for its efficiency and consistency to deliver CO₂ gas and turn-key design, including all fire and life safety code compliance.

At **enVgrow**, our unique flow control system and specialized programming maintain the most consistent gas saturation in the industry. Additionally, our systems include the highest-rated sensors along with industrial strobes and horns to ensure employee and customer safety at all times.

enVgrow's clients rest easy knowing their employees are happy and their facilities are safe and compliant.

A closer look at enVgrow's display showing all zones monitored. The system will display warnings and notify you of any irregularities.

If you are planning a new facility or considering upgrading your current one, we look forward to discussing your next indoor project and helping you maximize your grow!
